Reply to Office Action dated March 25, 2004

IN THE SPECIFICATION

Insert the following paragraph before the paragraph at page 7, line 19:

Fig. 5 is a conceptual cross-sectional view of an automobile door according to an alternative embodiment of the present invention.

Insert the following paragraphs before the paragraph at page 8, line 19:

40: Upper protrusion

41: Lower protrusion

Please replace the paragraph beginning at page 12, line 21, with the following rewritten paragraph:

The inner wall (this corresponds to the inner door panel) of the door trim structure 1 of the invention may be formed to have recesses and optionally protrusions (e.g., upper protrusion 40 and lower protrusion 41 depicted in Figure 5) on its surface, and a door windowpane-sliding mechanism and any other mechanisms (these are fitted to the metallic inner door panel in conventional automobile door systems) are readily fitted to such recesses or protrusions of the structure 1. If desired, metallic fitting tools may be attached to the structure 1 in a mode of insertion molding.
